Date	23 September 2026
Team ID	To be filled
Project Title	Global AI Adoption in Education: A Comprehensive Global Performance Intelligence Report
Maximum Marks	3 Marks

Project Proposal (Proposed Solution) Template

This project proposal outlines a solution to analyze global AI adoption in education using data preparation, Tableau visualization and business intelligence techniques.

Project Overview	Details
Objective	Analyze and communicate global AI adoption patterns in education through interactive Tableau dashboards.
Scope	Collect, clean, transform and visualize relevant AI-in-education indicators across countries/regions and available years.
Problem Statement	Relevant AI adoption information is distributed across datasets, making comparison and trend analysis difficult.
Description	Build a structured data-analysis workflow and Tableau report that converts raw data into understandable insights.
Impact	Supports clearer comparison of adoption levels, regional patterns and trends for educational analysis.
Approach	Data collection → quality checks → preprocessing → Tableau analysis → dashboards → insights/reporting.
Key Features	Interactive filters, charts, KPIs, comparative views and trend-based analysis.

Resource Requirements

Resource Type	Description	Specification / Allocation
Computing Resources	CPU/GPU for data preparation and Tableau work.	Standard laptop/PC
Memory	RAM for data processing.	8 GB or above
Storage	Space for datasets, workbook and reports.	As available
Frameworks	Data-analysis tools.	Tableau / Tableau Prep if required
Libraries	Optional preprocessing libraries.	Pandas / NumPy if used
Development Environment	Analysis and version control.	Tableau Desktop/Public, GitHub if used
Data	Global AI adoption in education dataset(s).	CSV/Excel/public source as applicable
